

## **Extension of the application period**

Kiel University has successfully applied for funding through the federal/state programme in support of early career researchers, and seeks to appoint more qualified women to professorships.

The position is available immediately at the Department of Internal Medicine I and the Institute of Clinical Molecular Biology at the Faculty of Medicine at Kiel University for  
a

### **W2 Professor (for 6 years) with Tenure Track for clinical metabolomics**

The future occupant of this position is expected to represent the subject of clinical metabolomics in research and teaching, as well as in translational medical research.

The successful candidate is expected to actively participate in both the faculty's priority research area "Digital Medicine - Identify, Understand, Heal" and will be fully integrated into the Cluster of Excellence "Precision Medicine in Chronic Inflammation".

The candidate should have a doctorate degree and an independent scientific qualification. It would be an advantage if a medical training has been received or adequate scientific experience in interaction with clinical medicine is documented

Scientific interest and interest in chronic gastrointestinal diseases (inflammation) is expected. The successful candidate should establish his/her own research agenda in clinical metabolomics, whereby the focus must be placed on translational studies which pursue mechanistic approaches to the interaction between metabolomic regulatory problems and chronic inflammation.

Close collaboration with Nutrition and Endocrinology (Prof. Dr Matthias Laudes) at the Department of Internal Medicine I as well as the Professor for Metabolomics at the Faculty of Medicine/Faculty of Agricultural and Nutritional Sciences (appointment pending) is intended. Broad methodological competence in the field of metabolomic technologies will be built up through this W3 Professor for Metabolomics. As the professorship will be pursuing a highly innovative approach, direct previous experience with clinical studies in this field is not a requirement. However, the candidate should present expertise in molecular and/or cell biology (evidenced through appropriately high-level publications) as well as experience which suggests that the task of conducting diagnostic and interventional studies can be fulfilled.

Please refer to the recruitment requirements of § 61 of the Higher Education Act of the State of Schleswig-Holstein.

After successful evaluation and if the additional requirements of § 62 of the Higher Education Act of the State of Schleswig-Holstein are met, the aim is to grant tenure in the professorship.

To this end at Kiel University, in accordance with the current statutes, an evaluation procedure is carried out, usually one year before the limited professorship ends.

More information can be found at [www.berufungen.uni-kiel.de](http://www.berufungen.uni-kiel.de) (in German).

Kiel University is striving to increase the number of female scientists in research and teaching and therefore expressly encourages qualified women to apply. Women will be given priority if their aptitude, qualifications and professional performance are of equal value.

The university is committed to the employment of severely disabled people. For this reason, severely disabled applicants will be given preferential treatment if they have the appropriate qualifications.

We expressly welcome applications from people with a migration background. Application photographs are not required and we expressly request that you to refrain from submitting any.

The Higher Education Act requires the Kiel University Medical Faculty and University of Lübeck Department of Medicine to work closely together as well as in close cooperation with the University Medical Center Schleswig-Holstein to determine and coordinate focus areas. The state further expects the clinics and institutes to cooperate with each other accordingly.

A symposium for choosing the candidate is planed on **May 12<sup>th</sup>, 2020**. (Because of the COVID19 crisis may be via video conference)

Applications should include the usual documents (curriculum vitae, publication list, list of lectures, copies of academic certificates), private and business addresses, telephone number and email address should be submitted by **24.04.2020** to:

Dekan der Medizinischen Fakultät  
der Christian-Albrechts-Universität zu Kiel  
Olshausenstr. 40  
24098 Kiel
